

Transportation Issues & Opportunities

- There is a concern for issues of maintenance of roads and bridges in the City, though limited city revenues pose a challenge for funding.
- The design of road improvements should be sensitive to the rural context of the City.
- The heavy use of some roads by the cycling community presents both opportunities and challenges.
- Heavy truck traffic on certain roads poses safety concerns for some residents.
- Though the city is still primarily rural, there are opportunities to develop bicycle and pedestrian corridors in desired locations.
- There is a need for transportation for the disabled and elderly in the community.

Transportation Policies

- Existing rural roads will not undergo any improvements that will change the character of the road.
- Support appropriate recommendations of existing planning studies, such as the South Fulton Comprehensive Transportation Plan, the GDOT Access Management Plan for South Fulton Parkway, and the MARTA Feasibility Study.
- Developers must build all the roads to support their developments.
- City bridges must have adequate sufficiency ratings.
- Very light traffic and free flow conditions fit the rural vision for the community, therefore the minimum Level of Service (LOS) acceptable for city roads is C.
